OffSite Backup

Introducing Peace of Mind

NCI Offsite Backup provides you with the peace of mind that comes from knowing that your important files and photos are safe from the largest disaster down to the smallest accidental keystroke. Using an online backup service ensures that your files are safe. Will the same disaster that damages your data damage your backup? Online backup eliminates the worry.

Safe - Your information is first stored in a secure datacenter. From there your data is replicated to a second secure datacenter in a different city.

Secure - The online backup data we send is safe from prying eyes. Your data is encrypted on YOUR computer...before it leaves. No one can access your files without a secure password.

Easy - We can be backing up your files just minutes from now with our simple yet powerful online backup software.

With **NCI Offsite Backup**, you can:

- Retrieve your files from anywhere via the Internet with a web browser!
- File retention for changed and deleted files. You choose the retention period
- Perform "Point-in-time" restores (your spreadsheet from 5 days ago!)
- Set online backup schedules according to your network needs
- Data compression to enhance speed and to optimize online storage
- Back up files on Windows, Linux/Unix and Mac systems
- Enjoy peace of mind knowing your critical data files are encrypted and protected offsite in a secure data center
- Eliminate the cost of creating and managing offsite backup media
- Never have to backup to Tapes, CDs, DVDs or any other unreliable media!
- Backup Exchange, MS SQL and Oracle Databases while they are in use.

With **NCI Offsite Backup** you can rest assured that your important information is safe and secure. Your **Important Information** can be anything from your small business tax records to the cherished photos of your family scanned and preserved on your computer. If you're like most computer users, you know that a backup is a necessity, but like most, you also don't have either the time or the knowledge to perform one.

Enter **NCI Offsite Backup**. We make it all easy. From scheduling to deciding what and when to backup, we can have you up and running in minutes. When does the backup occur? Whenever you want. At any hour of the day you set, your sensitive information will be backing up to our secure datacenters, ready for retrieval wherever and whenever you need it.

Here are a few of the features our service provides... even during your **FREE TRIAL** :

- Complete control of your file backups and restores. You decide what files to backup and when. You choose when to restore, and even from what machine.
- Web Restore—Restore files from any web browser. Need that file you backed up at home when you are in another city or country?
- Perform “Point-in-time” file restores. “Oops! I deleted 20 pages of that important document... 3 days ago!” - We store multiple copies of each file. Pick the date you need... 3 days ago, click restore— Problem solved.
- In-file Delta Block Backup. You only changed one word of your 300 page manuscript? – We just backup the changes...automatically.
- Back up Multiple computers with a single account. Your PC and your laptop.
- Changed and deleted file retention. You control the retention period. “I deleted that file 2 days ago....AND emptied the trash!” - Restore lost files, you decide how long we keep them.
- File Selection Filters. Choose the types of files you want to backup.
- Comprehensive, automatic scheduling for “hands-free” backups.
- Incremental Backup. Still saving your 4th grade school papers? Don't waste time backing them up every day if they haven't changed.
- 128 Bit Encryption and compression for fast, highly secure backups. Secure'em and squeeze'em (before they leave your machine or server).
- E-mail notification of missed or failed backups
- Runs as a service so you don't need to be logged in.
